

Youssef Samir Refky

Backend Engineer • Full-Stack Developer • Security-Focused Developer

📍 Cairo, Egypt 📞 +20 109 526 2732 ✉️ youssefrefky66@gmail.com

🌐 LinkedIn 🐙 GitHub

Professional Summary

Backend-focused Computer Science student with hands-on experience building secure web applications, REST APIs, automation systems, and AI-powered monitoring platforms. Experienced with Django, Node.js, PostgreSQL, Docker, and modern JavaScript technologies. Passionate about scalable backend development, cloud technologies, and Blue Team cybersecurity. Seeking Backend, Full-Stack, DevOps, or Security Engineering internship opportunities.

Education

Bachelor of Science in Computer Science 2026

CHI for Engineering, Computer Science & Management, Cairo

Technical Skills

Programming: Python, JavaScript, SQL, Java, C, C++

Backend: Django, Node.js, Express.js, REST APIs, JWT Authentication, Authorization, API Security, Event Logging

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Databases: PostgreSQL, MongoDB, SQLite

DevOps: Docker, Kubernetes, Jenkins, Linux, Nginx, CI/CD, Railway, Render, Vercel

Cybersecurity: Blue Team, SIEM Fundamentals, Threat Detection, Security Monitoring, Incident Response, Log Analysis, OWASP Top 10

Tools: Git, GitHub, Postman, WebSockets, Celery

Certifications

Cisco Networking Academy

• **JavaScript Essentials 1** Jul 2026

• **Cybersecurity Defense Analyst Pathway Exam** Jun 2026

- Blue Team Operations
- SIEM Fundamentals
- Security Monitoring
- Threat Detection
- Incident Response
- Log Analysis

Just to Learn for Information Technology December 2025

• **Certificate of Completion: Developing Creative and Innovative Thinking Skills in the Age of Artificial Intelligence**

Technical Projects

Smart Access & Monitoring System (Graduation Project) 2025–Present

GitHub Backend | GitHub Frontend

- Engineered an AI-powered campus security platform integrating face recognition, access control, attendance tracking, and real-time monitoring.
- Designed and implemented secure REST APIs with JWT authentication, authorization, and real-time event logging.

- Built a WebSocket-based notification system for live monitoring and alert delivery.
- Developed modular backend services supporting authentication, blacklist detection, attendance tracking, and future AI integrations.
- Technologies: Node.js, Express.js, REST APIs, JWT Authentication, WebSockets.

Inventory & Invoicing Management System

- Built a full-stack inventory management platform for inventory control, invoicing, and customer management.
- Developed automated PDF invoice generation with dynamic pricing and QR-code product linking.
- Designed responsive dashboards and optimized PostgreSQL database schemas for inventory operations.
- Implemented secure authentication and role-based access control.
- Technologies: Django, Python, PostgreSQL, JavaScript, Tailwind CSS.
